Summary

With nearly 2 years of experience, I am a proficient web developer who can excel both independently and in collaborative team environments. Additionally, I am always eager to embrace new learning opportunities, ensuring continuous growth in my skill set.

Experience

Fullstack Developer

July 2023 – Present

ERK

HaNoi, VietNam

- Designed and implemented a web application using **React.js** and **Ant Design** to manage internal advertising expenses, resulting in a **70%** increase in efficiency for the accounting and internal control departments.
- Developed and maintained a web-based reporting platform for employees utilizing **React.js**, **Node.js**, **MySQL**, and **MongoDB** to facilitate efficient task management.
- Managed and deployed source code to VPS, ensuring smooth implementation and server configuration.

Frontend Developer

Sep 2022 – June 2023

Techandy

HaNoi, VietNam

- Implemented a user interface based on designs from Figma using **Next.js**, **Material UI**, and integrated APIs with **GraphQL**.
- Developed comprehensive **Storybook** documentation for UI components.
- Collaborated with senior developers to implement new features and resolve bugs.
- Optimized website performance and resolved technical issues, enhancing speed and user experience.

Projects

Social network | *Nextjs, Tailwind Css, Nodejs, MySql, Git* | [Frontend](#) | [Backend](#)

- This is a social networking web application where users can post updates, comment on posts, and connect with each other.
- Developed a full-stack web application using with **Nodejs** serving a **REST API** with **Nextjs**, **Tailwind Css** as the frontend
- Utilized **Zustand** for frontend state management, ensuring efficient and scalable handling of application state.
- Implemented **JWT** authentication with refresh tokens to enhance security for users, ensuring secure and seamless access to the application.
- Implemented chat functionality using **Socket.io** for real-time communication.

Ecommerce website | *Reactjs, Material UI, Nodejs, MongoDB, Git* | [Frontend](#) | [Backend](#)

- Developed a fashion e-commerce website inspired by the design and functionality of the Adidas website.
- Utilized **Redux** for state management within the application, ensuring centralized and predictable state handling across components.
- Implemented **JWT**-based authentication for secure user authentication.
- Implementing real-time messaging functionality between users using **Socket.io**

Education

Hanoi University of Civil Engineering

Technical Skills

Languages: MySQL, JavaScript, HTML/CSS

Frameworks: React, Nextjs, Vuejs, Node.js

Libraries: Redux, Zustand, Tailwind Css, Material-UI, Socket.io

Developer Tools: Git, Docker
